enerzia®

CORPORATE PROFILE · 2026

Engineering power, infrastructure & clean energy.

Enerzia Group designs, builds and maintains electrical infrastructure, industrial facilities and commercial spaces — from engineering and procurement through installation, commissioning and ongoing support.

Think Smarter. Go Greener.

Chennai · Bengaluru · enerzia.com · info@enerzia.com

ABOUT ENERZIA GROUP

Fifteen years of engineering, one team.

Enerzia Group began in Chennai in 2010 with a focus on electrical power engineering. That expertise now supports a wider range of work across power infrastructure, industrial facilities, commercial buildings and clean energy.

Our teams design and deliver electrical and infrastructure projects and help customers keep their facilities running through technical audits, facility management and maintenance. Through Enerzia Solar, we apply the same engineering expertise to solar and battery energy storage for homes, businesses and industry. Our International Exports team supplies electrical equipment and industrial components to overseas customers.

With offices in Chennai and Bengaluru, we work alongside customers from the first engineering discussion through commissioning and ongoing service. We take responsibility for the quality of our work and look for practical ways to make the systems we deliver safer, more reliable and more energy efficient.

15+
Years of Engineering Excellence

850+
Projects Completed Safely

350+
Happy Customers Across India & Overseas

14+
States & 16+ Export Countries Served

VISION

To be a preferred global engineering partner for smarter infrastructure and cleaner energy, supporting the sustainable growth of our customers and communities.

Smarter Infrastructure. Cleaner Energy. Sustainable Growth.

MISSION

Guided by our ethos — Think smarter, go greener — we engineer and deliver high-performance power, solar and energy storage solutions through innovation, quality and commitment, strengthening both our customers' energy independence and the planet.

Innovate. Integrate. Deliver. Sustain.

OUR JOURNEY

From one office in Chennai to 850+ projects.

2010–2015

Establishment

100+ projects

Incorporated in Chennai, executed projects across 3 states, launched overseas exports in Saudi Arabia (2014), and delivered 13 substations, 4 power plants, 30 AMR projects and 15 AMC contracts.

2016–2020

Expansion & Recognition

250+ projects

Scaled industrial EPC, strengthened safety compliance, and won the India 500 CEO Award (2020), India 5000 Best MSME Award (2020) and Silicon India Company of the Year.

2021–2025

Diversification

500+ projects

Expanded into MEP, Facility Management, Industrial Automation and Solar/BESS, crossing 850+ completed projects across 14+ states.

CORE VALUES

Innovation

Smart Innovation

We continuously learn, embrace change, and adopt advanced electrical, automation, solar and storage technologies — including AI, IoT and energy storage — to build smarter solutions.

Excellence

Uncompromising Quality

We deliver safe, reliable, compliant and high-quality engineering across every project to ensure lasting performance that exceeds expectations.

Planet

Sustainability First

We lead with environmentally responsible practices, reducing carbon footprints and building green infrastructure that protects the planet.

Impact

Customer Empowerment

We put individuals, communities and enterprises first — designing transparent, efficient energy solutions that strengthen their energy independence and long-term value.

Culture

Integrity & Teamwork

We collaborate with honesty, accountability and mutual respect across our teams, partners and clients — as One Company, One Team.

THE ENERZIA WAY

- Think Clearly
- Plan Smartly
- Execute Professionally
- Report Honestly
- Review Objectively
- Improve Continuously

CERTIFICATIONS & RECOGNITION

ISO 9001:2015
Quality management system

ISO 45001:2018
Occupational health & safety

India 500 CEO Awards 2020
Winner

India 5000 Best MSME Awards 2020
Award recipient

Indian Achievers' Award 2020
Indian Achievers' Forum

Silicon India
Company of the Year

OUR BUSINESSES

Nine businesses, one engineering standard.

01 · BU01

Power & EPC

Enerzia Group engineers and delivers electrical power infrastructure for industrial facilities, commercial developments and utility projects. We support new installations, plant expansions and upgrades to existing electrical systems. Depending on the project, we can handle engineering, procurement, installation, testing and commissioning under a single scope.

- Electrical system design, single-line diagrams, general arrangement drawings and tender documentation
- Substations up to 400 kV, transformers, HT and LT switchgear, and control and relay panels
- Power distribution, HV and MV cabling, cable trays, terminations and internal and external electrification
- Electrical protection, earthing and lightning protection system design and installation

Power & EPC · +91 89258 17252 · power@enerzia.com

02 · BU04

Infrastructure & MEP

Enerzia Group builds and upgrades industrial and commercial facilities. We coordinate civil works, fabrication, and mechanical, electrical and plumbing services so that equipment, utilities and building systems fit the site and support its intended operations.

- Architectural, structural and MEP design coordination, technical documentation and approvals support
- Turnkey mechanical, electrical and plumbing works, including HVAC, ventilation, firefighting, water supply and drainage
- Civil construction, roofing, waterproofing, renovation and refurbishment
- Prefabrication, site welding, metal structures and equipment supports

Infrastructure & MEP · +91 89258 17254 · infra@enerzia.com

03 · BU08

Industrial Solutions

Enerzia Group designs, installs and upgrades the systems that keep industrial facilities running. We support new plants, production expansions and improvements to operating facilities, with services covering electrical distribution, HVAC, mechanical utilities, industrial automation and energy management.

- Industrial MEP and pre-engineered building (PEB) solutions
- SCADA, HMI and DCS automation and integration
- IoT integration for equipment and utility monitoring
- Smart lighting design with sensor-based controls

HVAC & Industrial Solutions · Senthilkumar · +91 88673 71606 ·

04 · BU02

Maintenance & Breakdown Services

Enerzia Group services high-voltage and low-voltage electrical assets through planned maintenance, shutdown work and fault response. We support customers with individual service requirements and recurring maintenance under annual contracts.

- Preventive and corrective maintenance of transformers, panels, switchgear and associated electrical equipment
- 24x7 breakdown troubleshooting, fault diagnosis and restoration support
- Planned shutdown servicing, inspection and testing
- Transformer oil filtration, protection relay testing and meter calibration

Maintenance & Breakdown Services · +91 89258 17257 · maintenance@enerzia.com

05 · BU03

Facility Management Services

Enerzia Group supports the day-to-day operation of technical building systems in industrial facilities, commercial properties and residential developments. We help facility teams organise routine checks, track equipment condition and schedule service work around the needs of the property.

- On-site technical manpower, equipment checks, operating logs, preventive maintenance schedules and service coordination
- Electrical and HVAC annual maintenance contracts, UPS and battery servicing, and maintenance of mechanical utilities
- Maintenance of fire alarms, extinguishers, hydrants and sprinklers, with Fire NOC coordination where applicable
- Building energy monitoring, system calibration, power quality and efficiency improvements, and support for building repairs and upgrades

Facility Management Services · +91 89258 17255 · fms@enerzia.com

06 · BU05

Workspace & Interior Solutions

Enerzia Group plans and executes fit-outs for offices and commercial workspaces. We work with customers who are fitting out a new location, renovating an occupied office or reconfiguring a floor to accommodate changes in team size and use.

- Space planning and turnkey commercial fit-outs
- Aluminium and glass partitions, false ceilings, flooring and interior finishes
- Lighting, electrical and HVAC coordination
- Workspace renovation and refurbishment

Workspace & Interior Solutions · +91 89258 17253 · interiors@enerzia.com

07 · BU06

Energy Audit Services

Enerzia Group assesses electrical safety, equipment condition and energy performance. We document our findings and recommend corrective actions so engineering and facility teams can prioritise repairs, safety improvements and energy-saving measures.

- Energy audits, load studies and energy-efficiency assessments
- Electrical safety audits covering installations, protection systems, earthing and lightning protection
- Infrared thermography of HT and LT panels, switchgear, motor terminals and switchyards
- Arc flash assessments

Energy Audit Services · +91 97898 94644 · info@enerzia.com

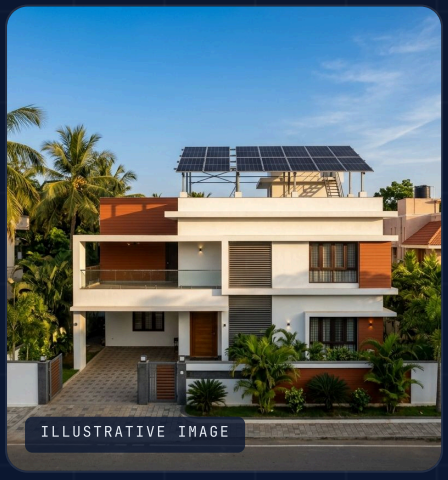

08 · BU07

International Exports

Enerzia Group sources and supplies electrical equipment and industrial components to overseas customers. Our International Exports team works from the buyer's technical and commercial requirements, coordinating supplier selection, export packing, documentation and shipment for the agreed order.

- Switchgear, LV and MV panels, metal enclosures and vacuum circuit breakers (VCBs)
- Transformers, transformer spares and compact secondary substations (CSS)
- HRC, LV, EV and solar fuses
- Energy and multifunction meters, LV capacitors and capacitor panels

International Exports · +91 89258 17250 · exim@enerzia.com

09 · BU01

Renewable & Clean Energy Solutions

Enerzia Solar designs, installs and maintains solar power and battery energy storage systems for homes, apartment communities, commercial properties and industrial facilities. We begin with how the site uses electricity and what the customer wants to achieve, whether that is lower daytime grid consumption, backup for essential loads or better use of available roof space.

- Rooftop solar for homes, villas and apartment common areas
- Commercial and industrial rooftop, captive and ground-mounted solar
- Solar feasibility studies, generation estimates and savings projections
- Battery Energy Storage Systems (BESS) for critical-load backup, stored solar utilisation and peak demand management

SELECTED PROJECTS

Work we have delivered.

2011 · Completed

400/220 kV Grid Substation

ECI Engineering & Construction (for PGCIL) · Shujalpur, Madhya Pradesh

2014 · Completed

110/11 kV GIS Substation

Toshiba JSW Power Systems · Manali, Chennai

2012 · Completed

Water Treatment Plant Circuit Breakers

Al-Qureshi Electrical Contracting (AQESA) · Marafiq, Yanbu, Saudi Arabia

2025 · Ongoing

PEB Shed Ventilation Fan Works

Larsen & Toubro

2025 · Completed

Fire Hydrant System MEP Works

Unipres India

2025 · Completed

Solar Lighting System

Kobelco

2024 · Completed

11 kV Electrical System AMC — 11 Locations

IndoSpace

2024 · Completed

Electrical Audit Rectification Work

DB Schenker

2016 · Completed

Electrical Maintenance Consumables

Dell

SELECTED CUSTOMERS

Trusted across sectors.

Enerzia Group works with customers across technology, property management, manufacturing, logistics and financial services.

Technology & IT Services

Microsoft · NTT DATA · Cognizant · Tech Mahindra · HCL Technologies · Accenture · Verizon

Property & Facility Management

CBRE · JLL · Cushman & Wakefield · Sodexo

Manufacturing & Engineering

Samsung · Renault Nissan Automotive India · Apollo Tyres · Larsen & Toubro · Schneider Electric Infrastructure · Voltas

Logistics & Supply Chain

Maersk · NX Logistics India · Yusen Logistics · Kuehne+Nagel · FedEx Logistics · DSV · CEVA Logistics · Rhenus Logistics · MOL Logistics

Industrial Parks

IndoSpace

Banking & Financial Services

DBS Bank India · Kotak Mahindra Bank
